EDUCATION

UC Berkeley - Management, Entrepreneurship, & Technology Program, May 2027 | GPA: 3.7

B.S. Electrical Engineering and Computer Science, B.S. Business Administration

- **Coursework:** Data Structures & Algorithms, Discrete Mathematics & Probability, Data Science, Macro/Micro, Linear Algebra
- **Activities:** Society of Women Engineers, CS Mentors, Calhacks, Voyager Consulting (Tech Manager), Cal Wushu/Kung Fu
- **Skills:** Python, Java, Data Structures, Graph Theory, Discrete Mathematics, Probability, Linear Algebra, Powerpoint, Excel, Sharepoint, Pandas, NumPy, SQL, Matplotlib, Power BI, Machine Learning, HTML/CSS, Figma, APIs, Mandarin (Native)

PROFESSIONAL EXPERIENCE

Barclays Investment Bank, Software Engineering Intern - Operational Resilience Jun 2025 – Present

- Built Python bot automating addition of 100,000+ risk plans to Barclays database, immediately adopted by resilience team.
- Reduced update time by 90%, saving 20+ hours/week in manual entry and greatly enhancing response times during crises.
- Led cash ordering strategy for UK Crown Dependency branches, collaborating with bank leaders to manage \$MM orders.
- Synthesized 200 articles on ERM, tech resilience, and cybersecurity and 10+ stakeholder interviews into 10-page risk plan.

The Trevor Project, Machine Learning/Full Stack Engineer Jan 2025 – Jun 2025

- Developed a real-time triage dashboard with OpenAI agentic routing to prioritize and address 100% of suicide hotline callers.
- Classified hotline calls using sentiment analysis and decision trees, recovering ~43% of previously missed calls (10K/quarter).
- Improved SEO by implementing RAG bot, using ~2K+ Trevor keywords and Google Search API to maximize resource impact.

Quest Diagnostics, Machine Learning Engineer Aug 2024 – Jan 2025

- Engineered multiple scalable decision tree, random forest, and linear regression models in Python, achieving a >95% accuracy.
- Trained time-series forecasting models to predict daily lab volumes across 850+ clients and 68 national business units.
- Performed exploratory data analysis on 10M+ transactions, conducting feature engineering and preprocessing for model fit.

Blue Origin, Technical Strategist Aug 2024 – Dec 2024

- Proposed space datacenter program with low-earth orbit (LEO) supply, aggregating three billion in free cash flow by 2030.
- Conducted comprehensive market, industry, and company research—presented final deliverable to Blue Origin Strategy Team.

Susquehanna International Group, Women's Discovery Program Attendee Nov 2024

University of Washington School of Business, Data Science Researcher Jun 2024 – Nov 2024

- Used Excel techniques to sort, filter, and highlight key patterns startups used to maximize investment on US funding sites.
- Presented poster at international grad-level conference, the Institute for Operations Research and Management Science.

PROJECTS & LEADERSHIP

Audiomate, <https://github.com/emilymo999/audiomate> Oct 2025

- Developed full-stack AI dashboard generating audio ads with Gemini-based script generation and ElevenLabs text-to-speech.
- Connected frontend to REST API for script, voice, and MP3 generation; enabled fast, polished ad creation with live previews.

Pacific Model United Nations Website, <https://pacificmun.com/> Feb 2022 – May 2024

- Collaborated with eng. team to develop website and registration platform for thousands per year, used React, Node.js, Auth0.

HONORS & AWARDS

4th Place in Financial Consulting, DECA International Career Development Conference

Top 10 Financial Literacy Exam Finalist, DECA International Career Development Conference

Coca Cola Scholarship Semifinalist, The Coca-Cola Scholars Foundation

Seal of Biliteracy in Chinese, Washington Office of Superintendent of Public Instruction

USA Kung Fu Team Member/National Champion, United States Wushu Kungfu Federation
